

either side wall or bottom wall, or between the side and bottom wall for supporting a plant pot, each of the at least one (post) strip separate from each other, (and not hollow,) the at least one (post) strip making enough space for reserving fluid in the tray.

2-26. (canceled)

27. (currently amended) A self watering tray for a plant pot, comprising:

    a tray, the tray having side walls and a bottom wall, the tray holding fluid; and

    at least one leg coupled to the tray, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, the low section having a closed side wall (and a top wall), and it's hollow, the up section (extending) formed upwardly from (the center of the top wall of) the low section, a shoulder between the up section and the low section supporting the plant pot.

28. (canceled)

29. (previously presented) The tray of claims 1, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the tray through the fluid intake lip.

30-43. (canceled)

44.(previously presented) The tray of claim 27, wherein the up section is hollow, the at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the tray.

45. (previously presented) The tray of claim 27, wherein a wick is accompanied while the up section is not hollow.

46. (canceled)

47. (previously presented) The tray of claim 1, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the tray.

48. (previously presnted) The tray of claim 47, further comprising a tube, the wick insert into the tube.

49. (previously presented) The tray of claim 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the plate through the fluid intake lip.

50. (presented amended) The tray of claim 29, wherein the at least one post having second section, the second section extending upwardly from the post.

51. (previously presented) The tray of claim 27, further comprising a bottom wall on low section of the at least one leg, at least one hole disposed on/or near the bottom wall for fluid communication in and out of the leg.

52. (prevoiusly presented) The tray of claim 27, further comprising a pad under the leg for standing more stable on the tray bottom.

53. (currently amended) A self watering tray for a plant pot, comprising:

    a tray, the tray having a side wall and a bottom wall, the tray holding fluid; and

    at least one leg having at least three wings, the at least one leg with at

least three wings formed into one piece (by a center part and at least three wings), the at least three wings extending outwardly from the central part, the at least one leg with at least three wings coupled to the tray for supporting a plant pot.

54. (previously presented) The tray of claim 53, wherein a pad disposed under at least one three wing leg for standing in the tray more stable.

55. (previously presented) The tray of claim 53, wherein at least one three wing leg extending upwardly from the bottom wall of the tray.

56. (previously presented) The tray of claim 53, wherein an up section extending upwardly from at least one three wing leg.

**In the Claims** (Clear version)

1. (currently amended) A self watering tray for a plant pot, comprising:
  - a tray, the tray having side walls and a bottom wall, the tray holding fluid; and
    - at least one strip extending upwardly from the wall of the tray either side wall or bottom wall, or between the side and bottom wall for supporting a plant pot, each of the at least one strip separate from each other, the at least one strip making enough space for reserving fluid in the tray.
- 2-26. (canceled)
27. (currently amended) A self watering tray for a plant pot, comprising:
  - a tray, the tray having side walls and a bottom wall, the tray holding fluid; and
    - at least one leg coupled to the tray, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, the low section having a closed side wall and it's hollow, the up section formed upwardly from the low section, a shoulder between the up section and the low section supporting the plant pot.
28. (canceled)
29. (previously presented) The tray of claims 1, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the tray through the fluid intake lip.
- 30-43. (canceled)
- 44.(previously presented) The tray of claim 27, wherein the up section is hollow, the

at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the tray.

45. (previously presented) The tray of claim 27, wherein a wick is accompanied while the up section is not hollow.

46. (canceled)

47. (previously presented) The tray of claim 1, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the tray.

48. (previously presented) The tray of claim 47, further comprising a tube, the wick insert into the tube.

49. (previously presented) The tray of claim 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the plate through the fluid intake lip.

50. (presented amended) The tray of claim 29, wherein the at least one post having second section, the second section extending upwardly from the post.

51. (previously presented) The tray of claim 27, further comprising a bottom wall on low section of the at least one leg, at least one hole disposed on/or near the bottom wall for fluid communication in and out of the leg.

52. (previously presented) The tray of claim 27, further comprising a pad under the leg for standing more stable on the tray bottom.

53. (currently amended) A self watering tray for a plant pot, comprising:  
a tray, the tray having a side wall and a bottom wall, the tray holding

fluid; and

at least one leg having at least three wings, the at least one leg with at least three wings formed into one piece, the at least three wings extending outwardly from the central part, the at least one leg with at least three wings coupled to the tray for supporting a plant pot.

54. (previously presented) The tray of claim 53, wherein a pad disposed under at least one three wing leg for standing in the tray more stable.

55. (previously presented) The tray of claim 53, wherein at least one three wing leg extending upwardly from the bottom wall of the tray.

56. (previously presented) The tray of claim 53, wherein an up section extending upwardly from at least one three wing leg.
